Safeguarding Children Affected by Problematic Drug and Alcohol Use (Parental and Child use)

Drug and alcohol use by parents or carers does not inevitably lead to poor outcomes for children, but each aspect of their lives may be affected.

Providing early help is more effective in promoting the welfare of children than reacting later. Early help means providing support as soon as a problem emerges, at any point in a child's life, from the foundation years through to the teenage years.

If you require advice about alcohol and drug use and the effect on children please click this link:
